ClassMovie for Food Garden

Dear Parents and Carers,

Support Unit Green has been asked to create a ClassMovie to showcase all the hard work we have been doing in our "Food Garden". We have been asked as part of a grant we were awarded from the NSW Environmental Trust and because it is an innovative project that has curriculum links and engages students in growing food.

Classmovies is a project funded and facilitated by the DEC to showcase innovative teaching and learning in schools across NSW. We are very excited about this opportunity. Attached is more information about ClassMovies and a permission to publish note to allow your child to participate. Please read the attached documents carefully before signing and returning to school. It is important to note that the NSW Environmental Trust will own the copyright of any images and may use these in any other publications. This includes but is not limited to:

- Publication of this material on the internet
- Duplication of the material in other publications such as newsletters, case studies, brochures, posters, promotional material
- Advertising in trade publications or other non-government publications
- Media kits
- Internal OEH/Environmental Trust Newsletters and OEH/Environmental Trust intranet
- Public presentations, seminars, training etc

Please return permission slip by Monday 15th November.

Mrs A. Hewson            Danielle McEvoy
Principal                                     Class Teacher
